

Sika at Work

Flooring solutions for DIY stores in Finland and Sweden

Innovation & Consistency | since 1910

Project Description

Sika has supplied flooring, roofing and joint sealant solution to Rautakesko's K-Rauta stores in Esbo and Imatra in Finland and Järfälla, Haparanda and Uppsala in Sweden. In addition the store in Linköping will have Sikafloor products installed during the spring of 2012.

Project Requirements

Jouko Räisänen is managing K-Rauta's construction projects in Finland, Sweden, Norway and the Baltics.

K-Rauta chose Sika as the supplier for Uppsala, Järfälla, Haparanda and Linköping because of Sika's reputation of supplying high quality products and reliable services. Mr. Räisänen says: "You can be really sure that the Sikafloor® products perform very well and meet the demands we have!"

He continues: "The flooring contractor SPT-Painting has been involved in Rautakesko's, the owner of K-Rauta, projects before and we know they have delivered high quality installations. That's why we chose them!" SPT also had a competitive offer, but Mr. Räisänen again pointed out that: "When you're using reliable and well-performing products, the decision is easy and everything pans out as planned."

From a functional point of view it is important that the floor has a high abrasion resistance and then the top coat Sikafloor®-169 was used. This is something that be part of the specification requirements for coming projects as well!

Sika Solutions

Sika Flooring Solutions

- Sikafloor®-156, primer
- Sikafloor®-263SL, pigmented and self-smoothing floor coating
- Sikafloor®-169 eller Sikafloor®-356, clear and wear resistant seal coats
